

PRODY-Poultry®

A Smart Step Toward Gut Health, Better Growth, and Stronger Flocks

PRODY-Poultry®

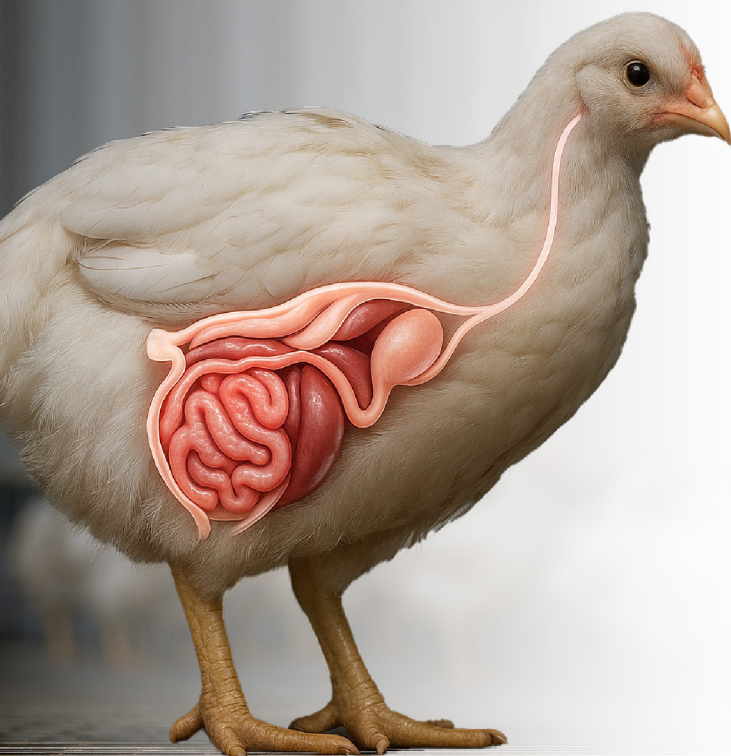

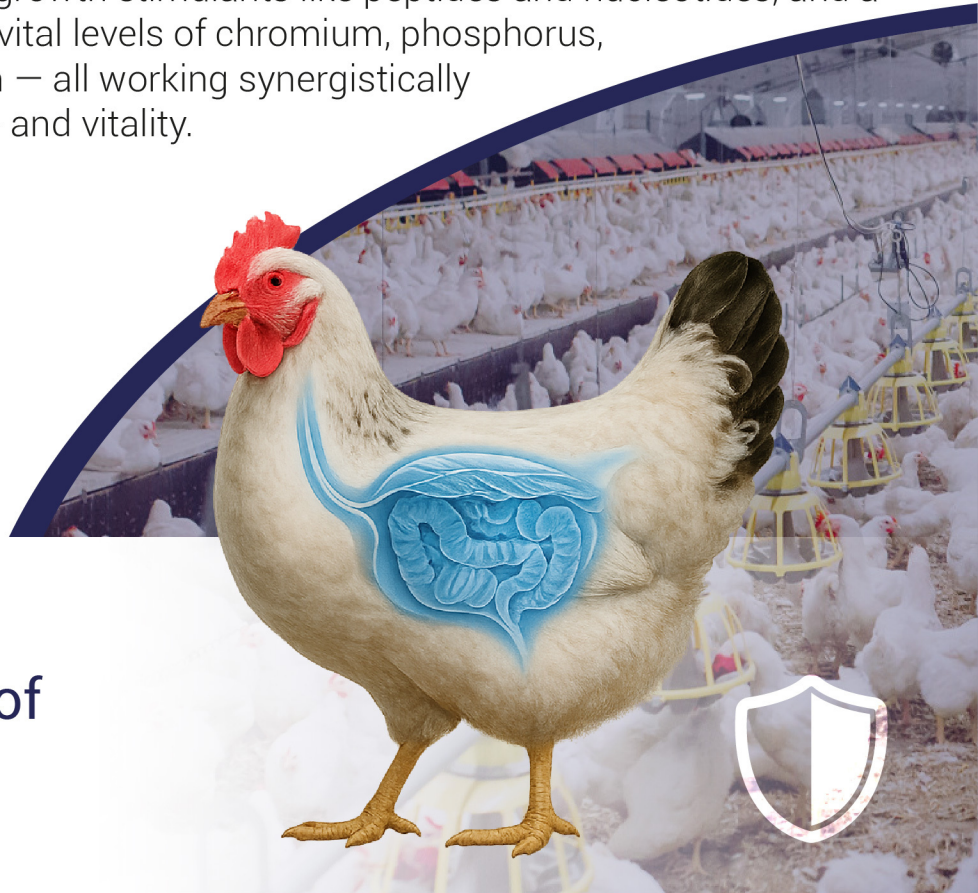

GENERAL INFORMATION

PRODY-Poultry® is an innovative product derived from premium yeast compounds, specifically designed to enhance poultry growth and ensure their overall health and safety. Packed with essential amino acids that promote robust growth, it also contains a powerful blend of B-vitamins, growth stimulants like peptides and nucleotides, and a rich array of minerals, including vital levels of chromium, phosphorus, and the highest quality selenium — all working synergistically to optimize poultry performance and vitality.

PRODY-Poultry® trains the immunity for challenges and beneficially modulates the intestinal microbiota

Immunity

Trains the immunity of young animals

PRODY-Poultry® contains several immune stimulating compounds (β -glucan, mannoprotein and chitin structures) and has increased water-solubility for better visibility to immune receptors. It has shown to increase the recruitment of T-lymphocytes and the immunoglobulin production in the gut. Due to these functions it has enhanced the immune responses of young animals under challenge. PRODY-Poultry® trains the immune system of young animals to cope better with the challenges.

Pathogen binding

Efficiently binds E. coli and Salmonella bacteria

PRODY-Poultry® contains similar carbohydrate structures, such as mannose-rich glycoproteins, as the intestinal mucus. These structures in available form provide attachment sites for the fimbriae of pathogens, thus preventing them from attaching to intestinal mucosa. PRODY-Poultry® has shown outstanding efficacy in preventing the adherence of E. coli and salmonella to intestinal mucus.

PRODY-Poultry® BENEFITS:

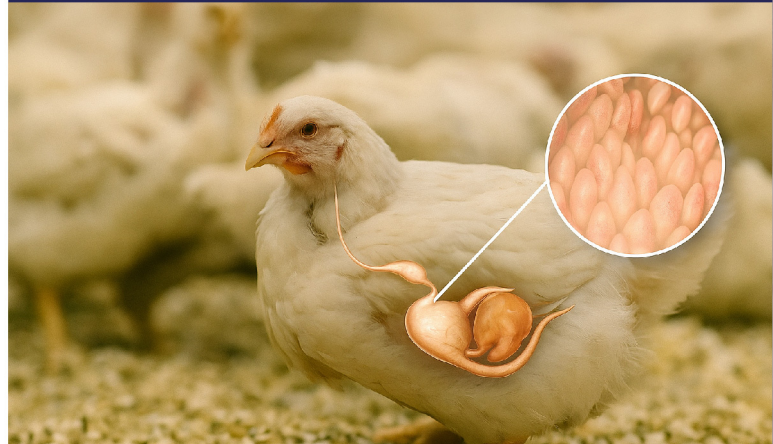

- Preventing the attachment of pathogens such as E. coli to the intestinal wall.
- increasing production of IgA In the intestine and reducing stress caused by illness.
- ncreasing in immune cells in the intestinal epithelium.
- Improving survival and reducing diarrhea and its complications.
- Improving growth, increasing egg production.
- improving feed conversion ratio.

Balancing microbiota

PRODY-Poultry® has shown to beneficially modulate the composition of gut microbiota in broilers.

GURANTEED ANALYSIS:

Protein	%45
Vitamin B1	2.4mg/100g
Vitamin B2	3.7mg/100g
Vitamin B6	0.12mg/100g
Amino Acids	%34
Se	0.19PPM
Cr	0.26PPM
Iron	9mg/100g
Zinc	16mg/100g
Manan+ Beta-glucan	%25

DIRECTIONS FOR USE:

Consumption in poultry feed:

Broilers and Turkeys:

Starter period: 0.5 kg/t of feed • Grower period: 0.4 kg/t of feed • Finisher period: 0.3 kg/t of feed

Layers and Breeder stock:

Layers, Pre-lay and Phase 0.5 :1 kg/t of feed • Breeder stock: 0.5 kg/t of feed

Consumption in poultry water:

100 grams per 1000 liters of water. First, it should be dissolved in 5 liters of water and then poured into the water tank.

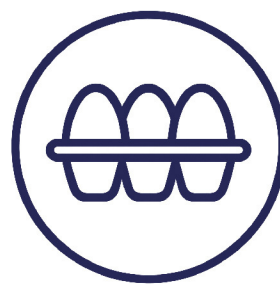

The recommended doses can be increased to double in challenging conditions.

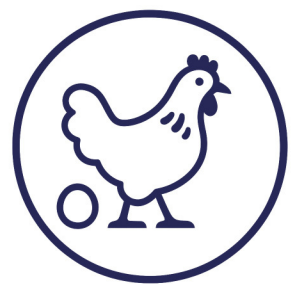

**Increase Natural
Immunity**

**Improve
Digestion**

**Increase Egg
Production**

**Weight
Gain**

PACKAGING:

500 g Sachets

SHELF LIFE:

24 months from date of manufacture.

STORAGE:

Store in a cool and dry place.

Additional Information:

To place orders, call Customer Service at + 09821-28429302.

Manufactured by:

Kavoshgar Sepehr Javan, IRI
